### **HIEU 127 - Sport in the Modern World**

This course looks at the phenomenon of sport in all of its social, cultural, political and economic aspects. Our starting point will be the emergence of modern sport in nineteenth century Britain, but our focus will be global. Our primary concern will be with elite sport, rather than participation sport or physical culture. Because our approach here will be topical rather than chronological, students should already have a good knowledge of world history in the nineteenth and twentieth centuries, as we will be attempting throughout the course to set sport in the context of the events of this period. Students who feel they lack historical background may want to read Eric Hobsbawm's works - *The Age of Empire* and *The Age of Extremes*. Other works covering the nineteenth and twentieth centuries are also acceptable.

There will be a mid-term exam and a final. Students may replace the mid-term with a research paper on a topic of their choice. In order to prevent purchased papers, students must submit a preliminary outline and bibliography. They must also meet to discuss the paper with the professor. This must be done before the mid-term. No topic can be approved after the mid-term. Plagiarism is the most serious academic offense a student can commit.
